

Neev Bhandari

Backend Engineer — Melbourne, Australia
neevbhandari13@gmail.com · github.com/NeevBhandari13 · LinkedIn

EXPERIENCE

- Backend Engineer** — ANZ, MelbourneMay 2026 – Present
- Built a RAG service for ANZ's internal documentation, indexing 500+ repositories, now adopted by 8 teams, driving internal enablement and engineering efficiency gains
 - Led a hands-on workshop training engineers across the organisation to adopt and effectively use the RAG service
 - Building an MCP server that aliases PII data, enabling agentic coding tools to safely assist engineers during live production incidents without exposing sensitive customer information
- Graduate (Rotational Program)** — ANZ, MelbourneFeb 2025 – May 2026
- Wrote an automation script for Confluence migration that saved approximately 200 hours of manual work
 - Selected as Events Lead for the Graduate Knowledge Committee, organising knowledge-sharing events across the graduate cohort
 - Backend Engineer rotation*: Designed and presented a commercial credit card solution to technical, non-technical, and senior leadership stakeholders, securing endorsement and driving the solution from concept to approval; Designed an endpoint to determine which bank accounts a customer is authorised to view, built to serve ANZ's 8 million customers at production scale
 - Quantitative Developer rotation*: Parallelised the daily trade preparation function, cutting approximately 1 hour from the daily batch run through low-latency C++ optimisation
 - Business Analyst, ANZ Plus rotation*: Translated technical and business requirements between engineering and stakeholder groups on ANZ Plus initiatives; Managed projects end-to-end, from requirements gathering through delivery
- Backend Engineer Intern** — ANZ, MelbourneJan 2024 – Jul 2024
- Used Go and gRPC to build transaction-processing APIs for the ANZ Plus application, integrating with Google Cloud Dataflow pipelines for scalable data processing
- Project Lead** — Monash DeepNeuronDec 2023 – Dec 2024
- Led a team to parallelise training of a CLIP model, increasing training efficiency
 - Implemented data parallelism in CNN training, achieving a ~30% performance improvement
- Energy Transition MACRE Vacationer** — PwCNov 2023 – Jan 2024
- Built financial models in Excel to project the financial performance of renewable energy assets
 - Developed valuation decks for solar and wind farm investments, supporting strategic investment decision-making
- Customer Service Advisor** — Bank of MelbourneJul 2022 – Nov 2023
- Advised customers on banking product offerings (loans, accounts, credit cards), consistently outperforming sales targets while balancing service and issue resolution in a regulated environment
- Membership Consultant** — Anytime FitnessDec 2020 – Jul 2022
- Planned and led a one-day membership sale event end-to-end, driving 70+ membership sales in a single day while consistently exceeding individual sales targets

PROJECTS

- LeetCoach** — leetcoach.net Go · Next.js · GCP
- Full-stack mock interview platform with a Go backend and Next.js frontend, deployed on Google Cloud Run with Google Cloud Storage, integrating Anthropic's API to power an AI interviewer guiding candidates through the interview process and providing adaptive feedback.
- Custom Language Compiler** Work in Progress C++ · x86-64
- Compiler for a custom language targeting Linux on x86-64, implementing tokenizing, parsing, and code generation for optimized assembly output.
- Length-of-Stay Neural Net** R · Machine Learning
- Neural network to predict patient length of stay from hospital data, applying regularization and dropout to improve model generalization.
- Wireless EV Charging Sim** C · OpenMP · MPI
- Simulated a wireless EV charging network using OpenMP for parallelism and MPI for distributed computation.
- Functional Guitar Hero** TypeScript · FP
- Rhythm game with a fully functional backend handling note timing, placement, and user interaction.

EDUCATION

- Monash University** — Bachelor of Computer Science / Bachelor of CommerceFeb 2021 – Dec 2024
- Majors: Advanced Computer Science, Business Analytics. Coursework: Data Structures & Algorithms, OOP, Parallel Computing, Statistical Machine Learning, High Dimensional Data Analysis, Statistics & Applications, Econometrics
- UC Berkeley** — Innovation & Entrepreneurship in Silicon ValleyJul 2023
- Intensive program covering entrepreneurship fundamentals, including design sprints and pitching.

CERTIFICATIONS

Google Cloud Associate Cloud Engineer Certified

SKILLS

- Languages:** Python, Go, C++, Java, R, SQL, TypeScript
- Cloud & Data:** Google Cloud Platform, BigQuery, Spanner, Cloud Storage, Cloud Run, Docker
- Tools & Platforms:** Git / GitHub, Jira, VS Code, Claude Code
